D2: Briefing Paper

AGTERGRONDINLIGTINGSDOKUMENT – CHARLIE 1 OPTIMALISERINGS- EN STORMWATERBESTUURSPROJEK, SASOL SYNFUELS SECUNDA, MPUMALANGAPROVINSIE – JULIE 2015

DO Verw.: Sal aangekondig word

1 Waarvan lig hierdie dokument u in?

Hierdie dokument poog om u, as 'n Belangstellende en Geaffekteerde Party (B&GP), te voorsien van agtergrondinligting betreffende die voorgestelde Charlie 1 Optimaliserings- en Stormwaterbestuursprojek te Sasol Synfuels Secunda, Mpumalangaprovincie. Die dokument verskaf ook inligting rakende die Omgewings-impakevalueringsproses (OIE-proses) wat onderneem gaan word. Verder bied die dokument besonderhede oor hoe u by die projek betrokke kan raak, inligting kan ontvang en/of vraagstukke kan opper wat u dalk raak en/of vir u van belang kan wees. Die deel van inligting vorm die grondslag van die openbare deelnameproses en bied u die geleentheid om uit die staanspoor aktief by die projek betrokke te raak. Openbare deelname speel 'n belangrike rol om die omgewingsimpakevalueringsproses toe te lig aangesien insette van B&GP's toesien dat alle potensiële vraagstukke in die studie oorweging geniet.

2 Wat behels die voorgestelde projek?

Die Sasol Synfuels, Secunda, Charlie 1 stortingsterrein is in 1993 as 'n Klas II Terrein ingevolge die Wet op Omgewingsbewaring (ECA) (Wet 73 van 1989) gemagtig. Onlangse veranderinge aan wetgewing, soos die Nasionale Wet op Omgewingsbestuur: Afval, 2008 (Wet 59 van 2008) en die Regulasies op die Klassifisering en Bestuur van Afval, 2013 (Staatskennisgewing R634) hou implikasies in vir die bestuur van afvalstortingsterreine.

Ten einde voldoening aan die bestaande permitvereistes te verseker, sal twee damme, naamlik: 'n Besoedelde Stormwaterdam en 'n Besoedelde Uitloogseldam van sowat 15 000 m³ en 1 500 m³ onderskeidelik gebou moet word. Die damme sal die doeltreffende bestuur van uitloosgel en stormwater wat by die stortingsterrein genereer word, verseker.

Die damme sal op landbougrond met diskresionêre grondgebruikregte langs die

westelike grens van die bestaande stortingsterrein op die plaas Driehoek 275 IS, Restant van Gedeelte 43 (soos gesien op die aangehegte liggingskaart) gebou word. Die voetspoor van die oppervlak waar die damme gebou sal word, is sowat 2 ha.

Daar word tans aan die hand gedoen dat besoedelde stormwater van die Charlie 1 stortingsterrein in grensriole langs die noordelike, westelike en suidelike grens opgevang word. Hierdie water word dan met valtoevoer aan die hand van 'n slikvanger na die besoedelde stormwaterdam gevoer. Stygende skoon stormwater word van die terrein weggelei deur 'n berm wat met die oostelike grens langs geleë is.

Besoedelde vlak syferwater, of uitloosgel, word in 'n ondergrondse "gordyn" onderskepiool wat langs die suidwestelike en noordelike grens van die terrein geleë is, opgevang. Dit word dan met valtoevoer aan die hand van 'n versamelpyp wat sowat 3 m ondergronds is, na 'n pompput in die noordwestelike hoek van die terrein gelei. Van hierdie pompput af word uitloosgel in die besoedelde uitloogseldam gepomp.

Sasol doen ook aan die hand om die bestaande stortingsterrein se hoogte na 20 m te verhoog ten einde die verlangde lugruimte vir die res van die stortingsterrein se leeftyd te bereik.

3 Alternatiewe

Ingevolge die OIE-regulasies (2014), moet oorweging aan bedryfbare alternatiewe as deel van die OIE-proses geskenk word. Alle geïdentifiseerde, bedryfbare alternatiewe moet met betrekking tot maatskaplike, biofisiese, ekonomiese en tegniese faktore geëvalueer word.

4 Wat is die potensiële omgewingsimpakte wat met die voorgestelde projek gepaardgaan?

'n Aantal potensiële omgewingsimpakte wat met die projek gepaardgaan, is geïdentifiseer. As deel

van die OIE-studie sal hierdie potensiële impakte deur die volgende spesialisstudies geëvalueer word:

- Vleilandevaluering
- Ekologiese Evaluering.

Hierdie OIE-studie maak ook staat op studies (d.i. waterhulpbronne-, voorafbedryfbaarheid- en bedryfbaarheids-evaluering) wat tevore vir die projek onderneem is.

5 Waarom word omgewingstudies benodig?

'n OIE is 'n doeltreffende beplannings- en besluitnemingswerktuig wat die identifisering van potensiële omgewingsgevolge van 'n voorgestelde projek, sowel as die bestuur daarvan deur die beplanningsproses, moontlik maak.

Ten einde die nodige afvalbestuurlisensie van die Departement van Omgewingsake (DO) te bekom, sal 'n volledige Bestekopname- en OIE-studie onderneem word om aan die lisensiëringsproses vir 'n afvalbestuurlisensie te voldoen.

Die OIE-studies sal ingevolge Staatskennissgewing 921 van 2013 van die Nasionale Wet op Omgewingsbestuur: Afval, 2008 (Wet 59 van 2008) onderneem word.

Staatkennissgewing 921 van NEM:WA (Afvalwet)

Staatkennissgewing 921	Aktiwiteite
Kategorie A	13
Kategorie B	1, 5 en 10

6 Watergebruiklisensie

Ten einde die nodige goedkeuring vir watergebruik van die Departement van Water en Sanitasie (DWS) te bekom, sal daar ingevolge Artikel 21g van die Nasionale Waterwet, 1998 (Wet 36 van 1998) aansoek gedoen word om 'n watergebruiklisensie.

7 Wat is u rol?

Sasol Suid-Afrika (Edms.) Bpk. het Royal HaskoningDHV se omgewingspan aangestel as

die onafhanklike Omgewingsevalueringspraktisyns (OEP's) om die omgewingstudies te onderneem ten einde alle potensiële omgewingsimpakte wat met die voorgestelde projek gepaardgaan, te identifiseer en te evalueer. As deel van hierdie omgewingstudies sal alle B&GP's aktief betrokke raak deur 'n openbare deelnameproses.

Indien u uself as 'n B&GP vir die voorgestelde projek ag, moedig ons u aan om gebruik te maak van die geleentheid wat deur die openbare deelnameproses geskep word om by die proses betrokke te raak en daardie vraagstukke en knelpunte te opper wat u raak en/of waarin u belangstel en waaroor u meer inligting verlang.

Deur die meegaande registrasievorm in te vul en in te dien, sal ons toesien dat u as 'n B&GP vir die projek geregistreer word en dat kennis geneem sal word van die knelpunte of navrae wat u betreffende die projek opper. Ons sal ook toesien dat u in die toekoms van inligting betreffende die projek, asook die beskikbaarheid van die Omgewingsverslae (d.i. die Bestekopname- en OIE-verslag) vir kommentaar, voorsien word.

8 Kommentaar en Navrae

Rig alle kommentaar, navrae of antwoorde aan:

BACKGROUND INFORMATION DOCUMENT - CHARLIE 1 OPTIMISATION AND STORMWATER MANAGEMENT PROJECT, SASOL SYNFUELS SECUNDA, MPUMALANGA PROVINCE – JULY2015

DEA Ref: TBA

1 What does this document tell you?

This document aims to provide you, as an Interested and Affected Party (I&AP), with background information regarding the proposed Charlie 1 Optimisation and Stormwater Management Project at Sasol Synfuels Secunda, Mpumalanga Province. The document also provides information regarding the Environmental Impact Assessment (EIA) process to be undertaken. Furthermore, the document advises how you can become involved in the project, receive information and/or raise issues, which may concern and/or be of interest to you. The sharing of information forms the basis of the public participation process and offers you the opportunity to become actively involved in the project from the outset. Public participation plays an important role in informing the environmental impact assessment process as input from I&APs ensures that all potential issues are considered within the study.

2 What is the proposed project all about?

The Sasol Synfuels, Secunda, Charlie 1 landfill site was authorised in 1993 as a Class II Site, in terms of the Environmental Conservation Act (ECA) (No. 73 of 1989). Recent changes in legislation such as the National Environmental Management: Waste Act, 2008 (No. 59 of 2008) and the Waste Classification and Management Regulations, 2013 (GN R. 634) have implications for the management of waste disposal sites.

To ensure compliance with the existing permit requirements, two ponds namely: Contaminated Stormwater Pond and Contaminated Leachate Pond of approximately 15 000 m³ and 1 500 m³ respectively, will need to be constructed. The ponds will ensure effective management of leachate and stormwater generated from the landfill site.

The ponds will be constructed on agricultural land with discretionary land-use rights adjacent to the western boundary of the existing landfill site on the farm Driehoek 275 IS, Ptn 43 remaining extent (as seen in the attached locality map). The footprint of area where the ponds will be constructed is approximately 2 ha.

It is currently proposed that contaminated stormwater from the Charlie 1 landfill site is captured in perimeter drains along the northern, western and southern boundary. This water is then gravity fed via a silt trap to the contaminated stormwater pond. Upslope clean stormwater is diverted away from the site by a berm located along the eastern boundary.

Contaminated shallow seepage, or leachate, is captured in a subsoil "curtain" interception drain, located along the south-western and northern boundaries of the site. This is gravity fed via a collection pipe located approximately 3 m below the ground to a sump located in the north-western corner of the site. From this sump, leachate is pumped into the contaminated leachate pond.

Sasol also proposes increasing the existing landfill height up to 20 m to achieve the required airspace for the remaining life of the landfill.

3 Alternatives

In terms of the EIA Regulations (2014), feasible alternatives are required to be considered within the EIA process. All identified, feasible alternatives are required to be evaluated in terms of social, biophysical, economic and technical factors.

4 What are the potential environmental impacts associated with the proposed project?

A number of potential environmental impacts associated with the project have been identified. As part of the EIA study, these potential impacts

will be assessed through the following specialist studies:

- Wetland Assessment.
- Ecological Assessment.

This EIA study also relies on previous conducted studies (i.e. water resources, pre-feasibility and feasibility assessments) for the project.

5 Why are environmental studies needed?

An EIA is an effective planning and decision-making tool, which allows for the identification of potential environmental consequences of a proposed project, and its management through the planning process.

In order to obtain the necessary waste management licence from the Department of Environmental Affairs (DEA) a full Scoping and EIA study will be undertaken to satisfy the waste management licencing process,

The EIA studies will be undertaken, respectively, in terms of Government Notice 921 of 2013 of the National Environmental Management: Waste Act, 2008 (No 59 of 2008).

GN 921 of the NEM: Waste Act

GN 921	Activities
Category A	13
Category B	1, 5 and 10

6 Water Use Licence

In order to obtain the necessary water use approval from the Department of Water and Sanitation (DWS), a water use licence will be applied for in terms of Section 21g of the National Water Act, 1998 (No. 36 of 1998).

7 What is your role?

Sasol South Africa Pty Ltd has appointed the environmental team from Royal HaskoningDHV, as the independent Environmental Assessment Practitioners (EAPs), to undertake the

environmental studies to identify and assess all potential environmental impacts associated with the proposed project. As part of these environmental studies, all I&APs will be actively involved through a public participation process.

If you consider yourself an I&AP for the proposed project, we encourage you to make use of the opportunities created by the public participation process to become involved in the process and raise the issues and concerns which affect and/or interest you, and about which you require more information.

By completing and submitting the accompanying registration form, we will ensure that you are registered as an I&AP for the project, and that your concerns or queries regarding the project will be noted. We will also ensure that you are provided with future information pertaining to the project as well as the availability of the Environmental Reports (i.e. Scoping & EIR Report) for comment.

**INCWADI YOLWAZI OLUYISENDLALELO – IPHROJEKTHI YE-CHARLIE 1
YOKUSETSHENZISWA NGOKUGCWELE NOKULAWULWA KWAMANZI EZIKHUKHULA, E-
SASOL SYNFUELS SECUNDA, ESIFUNDAZWENI SASEMPUMALANGA – JULAYI 2015**

DEA Ref: TBA

1 Ikutshelani le ncwadi?

Le ncwadi ihlose ukunikeza wena, njengoMuntu Onomdlandla Nothintekayo (I&AP), ulwazi oluyisendlalelo mayelana nePhrojekthi ehlongozwayo Ye-Charlie 1 Yokusetshenziswa Ngokugcwele Nokulawulwa Kwamanzi Ezikhukhula e-Sasol Synfuels Secunda, eSifundazweni SaseMpumalanga. Le ncwadi inikeza nolwazi mayelana nenqubo yoKuhlaziya Komthelela Kwezemvelo (EIA) ezokwenziwa. Ngaphezu kwalokho, le ncwadi ikweluleka ngokuthi ungabandakanyeka kanjani kule phrojekthi, uthole ulwazi kanye/noma uphakamise izinkinga, ezingase zikukhathaze kanye/noma ube nesasasa kuzo. Lokhu kucobelelana ngolwazi kwakha isisekelo senqubo yokubamba iqhaza komphakathi futhi kukunikeza ithuba lokuba neqhaza kule phrojekthi zisuka nje amadaka. Ukubamba iqhaza komphakathi kudlala indima ebalulekile ekwakheni inqubo yokuhlolwa komthelela kwezemvelo ngoba izimvo ezivela kuma-I&AP ziqinisekisa ukuthi zonke izinto ezingaba yinkinga ziyacatshangelwa ocwaningweni.

2 Imayelana nani le phrojekthi ehlongozwayo?

Indawo yokulahla udoti e-Sasol Synfuels, eSecunda, i-Charlie 1 yagunyazwa ngo-1993 njengeNdawo Yesigaba II, ngokuvumelana noMthetho Wokulondolozwa Kwemvelo (ECA) (No. 73 ka-1989). Izinguquko zamuva nje emthethweni njengoMthetho Wokulawulwa Kwezemvelo Kuzwelonke: Udoti, 2008 (No. 59 ka-2008) neZiqondiso Zokuhlukaniswa Nokulawulwa Kukadoti, 2013 (GN R. 634) zisho okuthile ngokulawulwa kwezindawo zokulahla udoti.

Ukuze kuqinisekise ukuthi kuhanjiswa nezimfuneko zemvume ekhona, kuzodingeka kwakhiwe amachibi amabili, okuyilawa: iChibi Lamanzi Ezikhukhula Angcolile neChibi Loketshezi Olungcolile, cishe angu-15 000 m³ no-1 500 m³ ngokulandelana. La machibi azoqinisekisa ukulawula ngempumelelo koketshezi namanzi ezikhukhula avela ezindaweni zokulahla udoti.

La machibi azokwakhiwa emhlabeni wokulima ngamalungelo okusebenzisa umhlaba ngokubona kwakho, eduze nomngcele osentshonalanga wendawo yokulahla udoti ekhona manje epulazini i-Driehoek 275 IS, iSiqephu 43 ingxenye esele (njengoba ibonakala ebalazweni lendawo elifakwe lapha). Ubungako bendawo okuzokwakhiwa kuyo amachibi bulinganiselwa kumahektha angu-2.

Okwamanje kuhlongozwa ukuba amanzi ezikhukhula angcolile avela endaweni yokulahla udoti i-Charlie 1 adonswe ngamadreyini asemgceleni osenyakatho, osentshonalanga noseningizimu. La manzi abe esegelezela esisefweni angene echibini lamanzi ezikhukhula angcolile. Amanzi ezikhukhula ahlanzekile aphezulu achezukiselwa kude nale ndawo ngonqenqema olusemgceleni osempumalanga.

Amanzi angcolile noma uketshezi kuvuzela ngaphansi edreyinini “eyikhethini” lomhlabathi ongaphansi, esemgceleni oseningizimu-mpumalanga nosenyakatho yale ndawo. Agelezela lapha ngepayipi lokuwaqoqa elisendaweni engaba ngu-3 m ngaphansi komhlaba bese eya emgodini osekhoneni elisenyakatho-ntshonalanga yesayithi. Uma lusuka kulo mgodi, uketshezi lumpontshelwa echibini loketshezi olungcolile.

I-Sasol ihlongoza nokwandisa ukuphakama kwendawo yokulahla udoti ekhona kube u- 20 m ukuze kufinyelelwe indawo yomoya edingekayo yaso sonke isikhathi esisele sokuba khona kwale ndawo.

3 Izindlela ezihlukile

NgokweZiqondiso Ze-EIA (2014), kudingeka kucatshangelwe izindlela ezihlukile ezingase zisetshenziswe phakathi nenqubo ye-EIA. Zonke izindlela ezihlukile ezihlonziwe, ezingase zisetshenziswe, kudingeka zihlolwe ngokwezenhlalo, ngokwakheka kwendawo, ngokomnotho nangendlela yokuzisebenzisa.

4 Yimiphi imithelela yezemvelo engase ibe khona ehlobene nephrojekthi ehlongozwayo?

Kuye kwahlonzwa imithelela yezemvelo engase ibe khona eminingana ehlobene nale phrojekthi. Njengengxenywe ye-EIA, le mithelela engase ibe khona izohlaziywa ngalezi zingcwaningo ezikhethekile ezilandelayo:

- Ukuhlolwa Kwexhaphozi
- Ukuhlaziywa Kwendawo Yemvelo Nezinto Eziphila Kuyo.

Ucwaningo lwe-EIA nalo luncike ezingcwaningweni ezenziwa ngaphambilini (okungukuthi, imithombo yamanzi, ukuhlolwa okwenziwa ngaphambi kokuba kwenziwe into nokuhlola ukuthi ingenzeka yini) zale phrojekthi.

5 Kungani kudingeka izingcwaningo zezemvelo?

I-EIA yithuluzi lokuhlola nokwenza izinqumo eliphumelelayo, elivumela ukuhlonzwa kwemiphumela engase ibe khona kwezemvelo ngenxa yephrojekthi ehlongozwayo kanye nokulawulwa kwayo ngenqubo yokuhlola.

Ukuze kutholakale ilayisensi yokulawulwa kukadoti edingekayo eMnyangweni Wezemvelo (DEA), kuyodingeka kwenziwe ucwaningo loKubhekwa Kwesimo nolwe-EIA oluphelele ukuze kwaneliswe inqubo yelayisensi yokulawulwa kukadoti.

Kuzokwenziwa izingcwaningo ze-EIA ngokulandelayo, ngokuvumelana neSaziso SikaHulumeni 921 sika-2013 soMthetho Wokulawulwa Kwezemvelo Kuzwelonke: Udoti, 2008 (No 59 ka-2008).

I-GN 921 ye-NEM: Umthetho Kadoti

GN 921	Imisebenzi
Isigaba A	13
Isigaba B	1, 5 no-10

6 Ilayisensi Yokusetshenziswa Kwamanzi

Ukuze kutholakale imvume yokusetshenziswa kwamanzi eMnyangweni Wezamanzi Nokukhucululwa Kwendle (DWS), kuyofakwa isicelo selayisensi yokusetshenziswa kwamanzi

ngokuvumelana neSigaba 21g soMthetho Wamanzi Kuzwelonke, 1998 (No. 36 ka-1998).

7 Iyini indima yakho?

I-Sasol South Africa Pty Ltd iqoke ithimba lezemvelo lakwa-Royal HaskoningDHV, njengaBahlaziyi Bezemvelo abazimele (ama-EAP), ukuba benze izingcwaningo zezemvelo zokuhlonza nokuhlola yonke imithelela engase ibe khona kwezemvelo ehlobene nale phrojekthi ehlongozwayo. Njengengxenywe yalezi zingcwaningo zezemvelo, wonke ama-I&AP azoba neqhaza ngenqubo yokubamba iqhaza komphakathi.

Uma uzibheka njenge-I&AP yale phrojekthi ehlongozwayo, sikukhuthaza ukuba usebenzise amathuba akhiwe inqubo yokubamba iqhaza komphakathi ukuze ubandakanyeke kule nqubo futhi usho izinkinga nezinto ezikukhathazayo kanye/noma onesasasa kuzo, nodinga ukuthola ulwazi olwengeziwe mayelana nazo.

Ngokugcwalisa nokuthumela ifomu lokubhalisa elihambisana naleli, siyoqinisekisa ukuthi ubhalise njenge-I&AP yale phrojekthi, nokuthi izinto ezikukhathazayo noma izinkinga mayelana nale phrojekthi ziyanakwa. Siyoqiniseka nokuthi unikezwa ulwazi lwesikhathi esizayo mayelana nale phrojekthi kanye neMibiko Yezemvelo (okungukuthi uMbiko woKubhekwa Kwesimo nowe-EIR) ukuze uveze uvo lwakho.

8 Izimvo Nemibuzo

Dear Interested and Affected Party,

ENVIRONMENTAL IMPACT ASSESSMENT AND WATER USE LICENCE FOR THE CHARLIE 1 OPTIMISATION AND STORMWATER MANAGEMENT PROJECT AT SASOL SYNFUELS SECUNDA, MPUMALANGA PROVINCE (DEA REF: TBA)

Notice is hereby given in terms of the National Environmental Management Act, 1998 (No 107 of 1998) (as amended), the EIA Regulations (2014) and the National Environmental Management: Waste Act, 2008 (No 59 of 2008) that Sasol South Africa (Pty) Ltd ('Sasol') will submit an application for a Waste Management Licence to the Department of Environmental Affairs (DEA) for the above project.

In order to obtain the necessary water use authorisation from the Department of Water and Sanitation (DWS), a water use licence will be applied for in terms of Section 21g of the National Water Act, 1998 (No 36 of 1998).

The Sasol Synfuels, Secunda, Charlie 1 landfill site was authorised in 1993 as a Class II Site, in terms of the Environmental Conservation Act (ECA) (No 73 of 1989). Recent changes in legislation such as the National Environmental Management: Waste Act, 2008 (No 59 of 2008) and the Waste Classification and Management Regulations, 2013 (GN R. 634) have implications for the management of waste disposal sites.

To ensure compliance with the existing permit requirements, two ponds namely Contaminated Stormwater Pond and Contaminated Leachate Pond of approximately 15 000 m³ and 1 500 m³ respectively will be constructed. The ponds will ensure effective management of leachate and stormwater at the site.

Sasol also proposes increasing the existing landfill height up to 20 m to achieve the required airspace for the remaining life of the landfill.

The environmental project team from Royal HaskoningDHV have been appointed as independent environmental assessment practitioners (EAP), to undertake the Environmental Impact Assessment (EIA) study and Public Participation (PP) process for this proposed project. Therefore, Royal HaskoningDHV would like to invite you, as an I&AP, to become actively involved in the PP process.

Please find attached herewith the project Background Information Document (BID) which provides you with more information regarding the proposed project and PP process to be undertaken. Also attached is a registration and comment form for you to complete, in order to be registered as an I&AP on the project database and to receive further information.

VACANCIES & NOTICES

KENNISGEWING VAN 'N OMGEWINGSIMPAKEVALUERINGS- EN WATERGEBRUIKLISENSIEPROSES

Kennis geskied hiermee ingevolge die Nasionale Wet op Omgewingsbestuur, 1998 (Wet 107 van 1998) (soos gewysig), die Regulasies op Omgewingsimpeakevaluerings (2014) asook die Nasionale Wet op Omgewingsbestuur: Afval, 2008 (Wet 59 van 2008) en Staatskennisgewing 921 dat Sasol Suid-Afrika (Edms.) Bpk. ('Sasol') 'n aansoek om 'n Afvalbestuurlisensie by die Departement van Omgewingsake (DO) vir die Charlie 1 optimaliserings- en stormwaterbestuursprojek sal indien. Sasol is van voorneme om 'n volledige Bestekopname- en OIE-studie te onderneem om aan die lisensieringsproses vir 'n afvalbestuurlisensie te voldoen.

Ten einde die nodige magtiging vir watergebruik van die Departement van Water en Sanitasie (DWS) te bekom, sal daar ingevolge Artikel 21g van die Nasionale Waterwet, 1998 (Wet 36 van 1998) aansoek gedoen word om 'n watergebruiklisensie.

AARD VAN DIE PROJEK	Die voorgestelde projek behels die volgende: • Die bou van twee damme, naamlik 'n Besoedelde Stormwater dam (sowat 15 000 m³) en 'n Besoedelde Uitloogseldam (sowat 1 500 m³). Die damme sal op landbougrond met diskresionêre grondgebruikregte langs die westelike grens van die bestaande stortingsterrein gebou word. • Die damme sal die doeltreffende bestuur van uitloogsel en stormwater wat by die stortingsterrein gegenereer word, asook voltooiing aan die bestaande permitvereistes, verseker. • Die verhoging van die bestaande stortingsterrein se hoogte na 20 m ten einde die verlangde lugruimte vir die res van die leeftyd van die stortingsterrein te bereik.
NAAM VAN PROJEK-VOORSTELLER	Sasol Suid-Afrika (Edms.) Bpk.
LIGGING	Die studiegebied is in die Govan Mbeki Plaaslike Munisipaliteit in Mpumalanga, naby Sasol, Secunda geleë. Die damme sal op landbougrond met diskresionêre grondgebruikregte langs die westelike grens van die bestaande Charlie 1 stortingsterrein op die plaas Driehoek 275 IS, Gedeelte 43 (Restant) gebou word.
GELYSSTE AKTIWITEITE	Aansoek is vir die volgende gelyste aktiwiteite gedoen: • Staatskennisgewing 921 (Lys van Afvalbestuursaktiwiteite): Kategorie A: Aktiwiteit 13 - Kategorie B: Aktiwiteit 1, 5 en 10
HOE OM TE REGISTREER	U kan as 'n Belangstellende en Geaffekteerde Party (B&GP) registreer of addisionele inligting aanvra deur: • direk met die omgewingskonsultant (kontakbesonderhede hieronder) in verbinding te tree; of • skriftelike kommentaar by Royal HaskoningDHV (per faks, pos of e-pos) in te dien. B&GP's word versoek om: • hul naam en van, kontakbesonderhede en belang by die projek aan die omgewingskonsultant te verstrek. Neem asseblief kennis dat B&GP's met verloop van tyd verwittig sal word van die beskikbaarheid van die konsepverslae vir openbare insae.
OMGEWINGSKONSULTANT	Royal HaskoningDHV <i>Enhancing Society Together</i> Nicole Botham Posbus 25302 Monumentpark, 0105 Pretoria Tel: 012 367 5800 Faks: 012 367 5878 E-pos: nicole.botham@rhdhv.com
VERWYSINGSNOMMERS	DO Verw.: Sal aangekondig word

NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT AND WATER USE LICENCE PROCESSES

Notice is hereby given in terms of the National Environmental Management Act, 1998 (Act No 107 of 1998) as amended, Environmental Impact Assessment Regulations (2014) as well as the National Environmental Management: Waste Act, 2008 (Act No 59 of 2008) and Government Notice 921, that Sasol South Africa (Pty) Ltd ('Sasol') will submit an application for Waste Management Licence to the Department of Environmental Affairs (DEA) for the Charlie 1 optimisation and stormwater management project. Sasol intends undertaking a full Scoping and EIA study to satisfy the waste management licencing process. In order to obtain the necessary water use authorisation from the Department of Water and Sanitation (DWS), a water use licence will be applied for in terms of Section 21g of the National Water Act, 1998 (Act No 36 of 1998).

PROJECT NATURE	The proposed project entails the following: • Construction of two ponds namely a Contaminated Stormwater Pond (approximately 15 000 m³) and a Contaminated Leachate Pond (approximately 1 500 m³). The ponds will be constructed on agricultural land with discretionary land-use rights adjacent to the western boundary of the existing landfill site. • The ponds will ensure effective management of leachate and stormwater generated from the landfill site as well as ensure compliance with the existing permit requirements. • Increasing the existing landfill height up to 20 m to achieve the required airspace for the remaining life of the landfill.
NAME OF PROPONENT	Sasol South Africa (Pty) Ltd
LOCATION	The study area is situated in the Govan Mbeki Local Municipality in Mpumalanga, within close proximity to Sasol, Secunda. The ponds will be constructed on agricultural land with discretionary land-use rights adjacent to the western boundary of the existing Charlie 1 landfill site on the farm Driehoek 275 IS, Portion 43 (remaining extent).
LISTED ACTIVITIES	The following listed activities have been applied for: • GN 921 (List of Waste Management Activities): Category A: Activity 13 - Category B: Activity 1; 5 and 10
HOW TO REGISTER	You can register as an Interested and Affected Party (I&AP) or request additional information by: • Contacting the environmental consultant directly (contact details provided below), or • Submitting written comments to Royal HaskoningDHV (via fax, post or e-mail). I&APs are requested to: • Provide their name and surname, contact information and interest in the project to the environmental consultant. Kindly note that I&APs will be notified in due course of the availability of the draft reports for public review.
ENVIRONMENTAL CONSULTANT	Royal HaskoningDHV <i>Enhancing Society Together</i> Nicole Botham P O Box 25302 Monument Park, 0105 Pretoria Tel: (012) 367 5800 Fax: (012) 367 5878 E-mail: nicole.botham@rhdhv.com

KENNISGEWINGS / NOTICES

GOVAN MBEKI MUNICIPALITY
PERMANENT CLOSURE OF A PARK IN TRICHARD TOWNSHIP

It is hereby notified in terms of Section 68 of the Local Government Ordinance, 1939 (Ordinance 17 of 1939), as amended, that the Govan Mbeki Municipality intends to permanently close Portion 5 of Erf 383 (park), Trichard Township located on the corner of Barney Molokwane and Van Belkum Streets, in order to alienate the property.

A plan indicating the locality of the Park to be closed is open for inspection during normal office hours at the Department of Technical and Engineering Services, Southern wing, Municipal Offices, Secunda for a period of 30 (thirty) days from the date of publication of this notice.

Any person desirous of objecting to the proposed permanent closure or the alienation of the park, or who wishes to make recommendations, or who will have any claim for compensation if such closure is executed, should lodge such objection, recommendation or claim, as the case may be, in writing to the Municipal Manager, Private Bag X1017, Secunda 2302 to reach him within 30 (thirty) days from the date of publication of this notice.

If more information is required, please phone Ms. Sabeth Nkosi at telephone nr. 017 620 6053.

Mr. M. F. MAHLANGU, Municipal Manager

IZINOMBOLO ZERIFARENSI	IRIFARENSI YE-DEA: TBA

KENNISGEWING VAN 'N OMGEWINGSIMPAKEVALUERINGS- EN WATERGEBRUIKLISENSIEPROSES

Kennis geskied hiermee ingevolge die Nasionale Wet op Omgewingsbestuur, 1998 (Wet 107 van 1998) (soos gewysig), die Regulasies op Omgewingsimpeakevaluerings (2014) asook die Nasionale Wet op Omgewingsbestuur: Afval, 2008 (Wet 59 van 2008) en Staatskennisgewing 921 dat Sasol Suid-Afrika (Edms.) Bpk. ('Sasol') 'n aansoek om 'n Afvalbestuurlisensie by die Departement van Omgewingsake (DO) vir die Charlie 1 optimaliserings- en stormwaterbestuursprojek sal indien. Sasol is van voorneme om 'n volledige Bestekopname- en OIE-studie te onderneem om aan die lisensieringsproses vir 'n afvalbestuurlisensie te voldoen.

Ten einde die nodige magtiging vir watergebruik van die Departement van Water en Sanitasie (DWS) te bekom, sal daar ingevolge Artikel 21g van die Nasionale Waterwet, 1998 (Wet 36 van 1998) aansoek gedoen word om 'n watergebruiklisensie.

AARD VAN DIE PROJEK	Die voorgestelde projek behels die volgende: • Die bou van twee damme, naamlik 'n Besoedelde Stormwater dam (sowat 15 000 m³) en 'n Besoedelde Uitloogseldam (sowat 1 500 m³). Die damme sal op landbougrond met diskresionêre grondgebruikregte langs die westelike grens van die bestaande stortingsterrein gebou word. • Die damme sal die doeltreffende bestuur van uitloogsel en stormwater wat by die stortingsterrein gegenereer word, asook voldoening aan die bestaande permitvereistes, verseker. • Die verhoging van die bestaande stortingsterrein se hoogte na 20 m ten einde die verlangde lugruimte vir die res van die leeftyd van die stortingsterrein te bereik.
NAAM VAN PROJEK-VOORSTELLER	Sasol Suid-Afrika (Edms.) Bpk.
LIGGING	Die studiegebied is in die Govan Mbeki Plaaslike Munisipaliteit in Mpumalanga, naby Sasol, Secunda geleë. Die damme sal op landbougrond met diskresionêre grondgebruikregte langs die westelike grens van die bestaande Charlie 1 stortingsterrein op die plaas Driehoek 275 IS, Gedeelte 43 (Restant) gebou word.
GELYTE AKTIWITEITE	Aansoek is vir die volgende gelyste aktiwiteite gedoen: • Staatskennisgewing 921 (Lys van Afvalbestuursaktiwiteite): Kategorie A: Aktiwiteit 13 Kategorie B: Aktiwiteit 1, 5 en 10
HOE OM TE REGISTREER	U kan as 'n Belangstellende en Geaffekteerde Party (B&GP) registreer of addisionele inligting aanvra deur: • direk met die omgewingskonsultant (kontakbesonderhede hieronder) in verbinding te tree; of • skriftelike kommentaar by Royal HaskoningDHV (per faks, pos of e-pos) in te dien. B&GP's word versoek om: • hul naam en van, kontakbesonderhede en belang by die projek aan die omgewingskonsultant te verstrek. Neem asseblief kennis dat B&GP's met verloop van tyd verwittig sal word van die beskikbaarheid van die konsepverslae vir openbare insae.
OMGEWINGSKONSULTANT	 Royal HaskoningDHV <i>Enhancing Society Together</i> Nicole Botham Posbus 25302 Monumentpark, 0105 Pretoria Tel: 012 367 5800 Faks: 012 367 5878 E-pos: nicole.botham@rhdhv.com
VERWYSINGSNOMMERS	DO Verw.: Sal aangekondig word

NOTICE OF ENVIRONMENTAL IMPACT ASSESSMENT AND WATER USE LICENCE PROCESSES

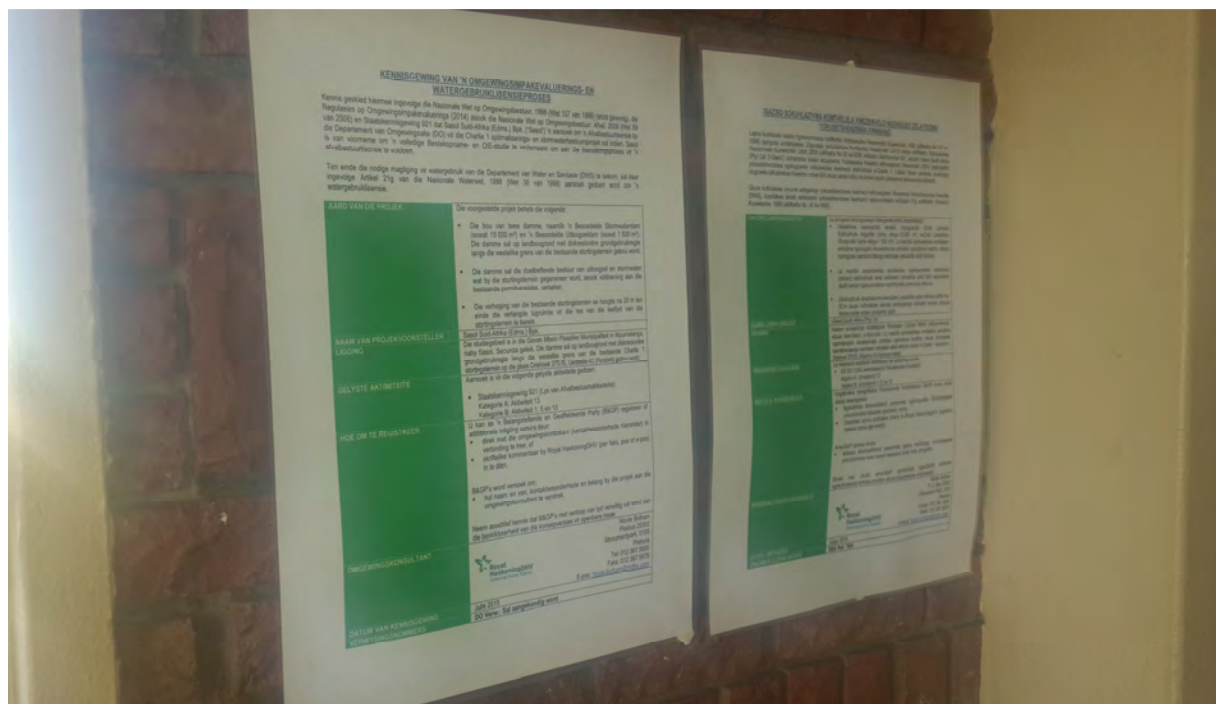

Notice is hereby given in terms of the National Environmental Management Act, 1998 (Act No 107 of 1998) as amended, Environmental Impact Assessment Regulations (2014) as well as the National Environmental Management: Waste Act, 2008 (Act No 59 of 2008) and Government Notice 921, that Sasol South Africa (Pty) Ltd ('Sasol') will submit an application for Waste Management Licence to the Department of Environmental Affairs (DEA) for the Charlie 1 optimisation and stormwater management project. Sasol intends undertaking a full Scoping and EIA study to satisfy the waste management licencing process. In order to obtain the necessary water use authorisation from the Department of Water and Sanitation (DWS), a water use licence will be applied for in terms of Section 21g of the National Water Act, 1998 (Act No 36 of 1998).

PROJECT NATURE	The proposed project entails the following: • Construction of two ponds namely a Contaminated Storm-water Pond (approximately 15 000 m³) and a Contaminated Leachate Pond (approximately 1 500 m³). The ponds will be constructed on agricultural land with discretionary land-use rights adjacent to the western boundary of the existing landfill site. •The ponds will ensure effective management of leachate and stormwater generated from the landfill site as well as ensure compliance with the existing permit requirements. •Increasing the existing landfill height up to 20 m to achieve the required airspace for the remaining life of the landfill.
NAME OF PROPONENT	Sasol South Africa (Pty) Ltd
LOCATION	The study area is situated in the Govan Mbeki Local Municipality in Mpumalanga, within close proximity to Sasol, Secunda. The ponds will be constructed on agricultural land with discretionary land-use rights adjacent to the western boundary of the existing Charlie 1 landfill site on the farm Driehoek 275 IS, Portion 43 (remaining extent).
LISTED ACTIVITIES	The following listed activities have been applied for: • GN 921 (List of Waste Management Activities): Category A: Activity 13 Category B: Activity 1; 5 and 10
HOW TO REGISTER	You can register as an Interested and Affected Party (I&AP) or request additional information by: • Contacting the environmental consultant directly (contact details provided below), or • Submitting written comments to Royal HaskoningDHV (via fax, post or e-mail). I&APs are requested to: • Provide their name and surname, contact information and interest in the project to the environmental consultant. Kindly note that I&APs will be notified in due course of the availability of the draft reports for public review.
ENVIRONMENTAL CONSULTANT	Royal HaskoningDHV Enhancing Society Together Nicole Botham P O Box 25302 Monument Park, 0105 Pretoria Tel: (012) 367 5800 Fax: (012) 367 5878 E-mail: nicole.botham@rhdhv.com
