

Translation of response that was sent to Susanna Booyens in regards to her queries sent on the 26th of August 2015

Good afternoon Susanna

Thank you for your comments. I will immediately act on it in our report. Our social specialist will also consider your comments and incorporate in her report. I will also include/add you on our database. You will be notified of any future meetings in regards to the impact study.

Attached is the Afrikaans version of the Background Information Document (BID) that was put together to explain what the projects are about. I hope this helps and you find it sufficient.

Regarding your questions about when the construction of the projects will take place and how you should apply. Currently we are unable to provide you with answers. Royal HaskoningDHV is currently working on the Environmental Impact Study. During this process, we aim to identify any / all environmental and social impacts. We try to provide solutions that will help to avoid any future impacts and problems. A final environmental report is then given to the Department of Environmental Affairs (we aim for March 16, 2016). They will then give approval for the project to be built. Only then will we be notified of any jobs. But I believe that the Municipality will be kept informed of any planned construction.

If you have any further questions, feel free to contact me between the hours of 6:45 – 15:30.

Kind Regards

Johan Blignaut

Goeie middag Susanna

Baie dankie vir jou kommentaar. Ek sal dit dadelik in ons verslag inwerk. Ons sosiale spesialis sal ook na u kommentaar kyk en dit in haar verslag inwerk. Ek gaan u ook op ons databasis plaas. U sal dan in kennis gestel word van enige toekomstige vergaderings rakend die impak studie.

Aangeheg is die afrikaanse weergawe van 'n informasie dokument wat ons saamgestel het om te verduidelik waarom die projekte gaan. Ek hoop dit help en u vind dit voldoende.

Ten opsigte van u vrae oor wanneer die bou van die projekte sal plaasvind en hoe mens moet aansoek doen. Ons kan huidiglik nie vir u antwoorde daarop gee nie. Royal HaskoningDHV is huidiglik besig met die omgewings impak studie. Tydens hierdie proses poog ons om enige/alle omgewings en sosiale impakte te identifiseer. Ons probeer dan oplossings gee wat sal help om probleme te verhoed. 'n Finale omgewingsverslag word dan aan die Departement van Omgewings Sake gegee (ons mik vir 16 Maart 2016). Hulle gee dan goedkeuring op die projek om gebou te kan word. Eers dan sal mens in kennis gestel kan word van enige werkseleenthede. Maar ek glo dat die Munisipaliteit op hoogte gehou sal word van enige beplande konstruksie.

As u enige verdere vrae het kan u my enige tyd kontak tydens my werks ure (6:45 – 15:30).

Vriendelike Groete

Johan Blignaut
